AUTOMOTIVE - OE AND AFTERMARKET

As a pioneering company in the automotive industry headquartered in Melbourne Australia, Mackay has over eight decades of technical expertise in developing high quality original equipment and aftermarket products. Mackay automotive products are renowned throughout the industry for uncompromising quality and dependability, with our new Thailand facility ensuring we remain globally competitive.

In the automotive aftermarket we have an extensive product portfolio covering worldwide applications, including an extensive off-the-shelf range to suit North American, Japanese, European and Korean vehicles. A pro-active and continuous new product development program ensures our range remains current.

Mackay custom-manufactures and offers private branding to suit your market specific requirements with relatively low minimum quantities. Products are engineered at our Australian headquarters and manufactured without compromise in our facility in Thailand (LCC) using the experience gained from supplying the OE market for 87 years.
