 - ▶ **LOW MAINTENANCE**
 - ▶ **SIGNIFICANTLY REDUCED NOISE SIGNATURE**

Armourtec SRT is a revolutionary track system developed by Mackay Defence in partnership with Australian Department of Defence and Defence Science and Technology Australia. It is a modular and tailorable armoured vehicle track that brings significant reductions in maintenance, vibration and noise. Armourtec SRT requires no change to existing running gear. Its segmented design facilitates a fast and permanent repair of battle damage, whilst removing the requirement to carry entire replacement track.

The Mackay Defence propriety rubber formula is a advanced low wear compound, proven to last up to 27% longer than competitive systems. Armourtech SRT is tailorable to meet challenging environmental conditions across the full spectrum of Armoured Vehicle Systems.
