## CB44 –Adjustable Arch Support Instructions

The Adjustable Arch Support is designed to help reduce pain in your feet, legs and back while providing maximum comfort. Your customizable arch support comes with 3 different height levels for each foot to allow you to adjust to your own comfort level and needs. Each insert is labeled for either the right or left foot, as indicated by the L (left) or R (right) before the height of the insert. The height of the insert is indicated by the numbers on the inserts, with higher numbers representing a taller height. As an example, the insert marked L26 is tallest insert for the left foot.

To properly apply the insert to the insole, place the insert on the bottom of the sole. The hook and loop on the bottom of the insert and the insoles are shown in Figure A. Please attach the insert's hook and loop to the insoles' hook and loop surface. As shown in Figure B, the insert can be pressed onto the insoles easily.

The insert can be adjusted forwards, backwards and sideways for most comfort. It is recommended that you test with your bare foot before inserting the support in your shoe. Customize the size of the sole by cutting it at the front, use the indicated lines as a guide for a better fit.
